Month 0 Day x

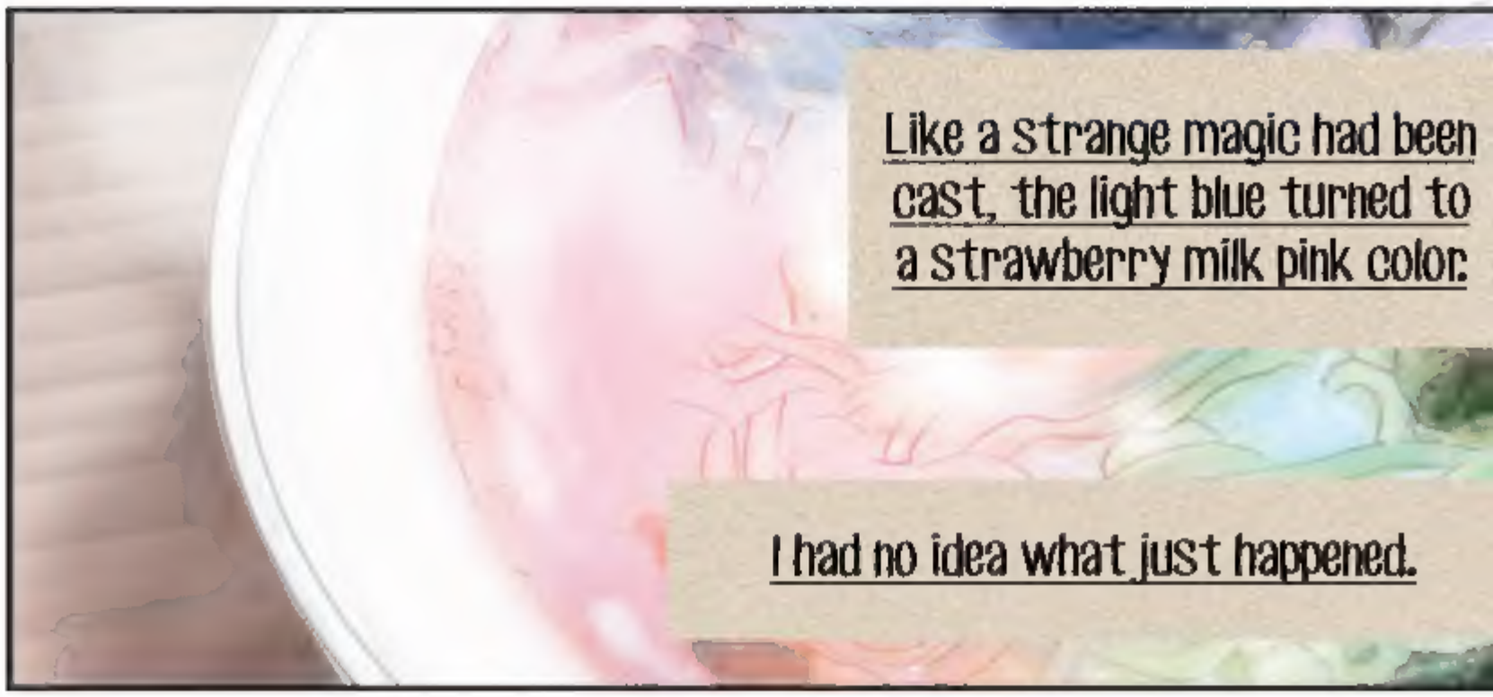
Today Koizumi-San has——

eaten a Light Blue Ramen.

I felt a little apprehensive, but that can't be helped.

The colors made it look like a monster from a foreign animation.

Halfway through Koizumi-san added vinegar to her ramen. And then——



But Koizumi-san just looked like she was in heaven the whole time.

That's basically what happened.

By the way, I had the "Cocoa Ramen".

Mhm?!

I THOUGHT IT'D BE LIKE CHOCOLATE FONDUE WITH NOODLES!!

Hm? The after-taste is a faint cocoa flavor!?

But this is definitely ramen!!

Today as well I struck up a conversation with her,

Silence

.....

LIKE LIGHT BLUE AND PINK.

Hey, hey

WHAT DOES IT TASTE LIKE?

Hey.

and I was really happy we got along so well on our way here! ♪

I beg you, please!!

.....

PLEASE, TAKE ME WITH YOU!

I'm begging you!! Please!!

——But

while I'm with Koizumi-san, sometimes I think that-

Ramen is like the universe, huh.

GYOZA	750	NATTOU RAMEN	750
ANPON	500	SOY MILK RAMEN	750

GREEN TEA RAMEN	750		

ICE CREAM RAMEN

YEL-LOW... BLUE... WHAT'S JYORO-KON*?

-ALKA-LINE!?

禁煙 NO SMOKING

*I kept Jyorokon Ramen in JP cause the translation would be too obvious (Yam&Kelp), even natives don't understand what it is when they see it on the menu as you've seen Yuu wondering what it was. It comes from jinenjyo (自然薯, Japanese yam) + tororo konbu (とろろ昆布, shredded kelp).

T/N: Ramen store of the day: **Kikuya**

About the Alkaline Ramen, whenever someone asks what the base for the soup is the chef pulls out batteries from the fridge, the smaller ones are for kids while the bigger ones for adults. He says students who have entrance exams usually have this one, it helps charging their brains.

There's also Ice Cream Ramen, user RocketNews24 posted a vid about it on YT. Both noodles and soup are cold, so it doesn't melt immediately.

Colored ramen are made from: red->tomato, blue->veggie juice, yellow->turmeric, light blue and purple->red cabbage (or other types of veggies)

Legend says the strange flavored ramen started when a child stopped by the store on a hot day and asked the owner for ice cream, joking about an ice cream ramen.

And that silly joke made reality ended up on the shop's menu, followed by the other strange flavored ones.

There's regular ramen and other types of normal carbs too in case you don't want to venture on the weird side of ramen.
